

****CONSTRUCTION NOTICE****

2025 Mill & Overlay Project

Construction for this project is anticipated to start at the end of this week.

The construction activities for this project will generally progress as follows:

1. Traffic Control (Signs)
2. Spot Removals
3. Storm Sewer Work
4. Spot Replacement of Curb
5. Milling of Street
6. Paving of Street
7. Turf Restoration

Homeowner impacts:

When the contractor is working on your segment of the project, please be patient for everyone's safety. We ask that you please follow the directions given by the workers. If you have an invisible fence or irrigation system, please mark them prior to work beginning to reduce the risk of damaging the system. If invisible fences or irrigation are damaged, please let us know as soon as possible. We will repair invisible fences as quickly as possible, and irrigation will be repaired as part of the turf restoration process. We will attempt to isolate the damaged irrigation, so your overall system stays working. We apologize for the inconvenience that this project will cause and thank you for your cooperation. The intent of the project team is to maintain access to properties throughout the construction; however, at times construction activities may interfere with access to individual properties for a short period of time. With that in mind, the project team will work with individual property owners during times of disruption. Please do not park on the street when construction begins. Additional information will be sent as needed to inform residents of any vital construction activities.

****PLEASE NOTE THAT ALL SCHEDULE DATES AND TIMES ARE TENTATIVE AND WEATHER DEPENDENT. ****

Questions on the overall project contact Construction Project Representative – Lauren Schmidt (651) 421-0995

Thank you for your continual patience and cooperation throughout the process of improving your street and utilities!
